Education

University of Illinois Urbana-Champaign Expected Graduation: 2027
Bachelor of Science, Major in Computer Science, Minor in Business *GPA: 3.96/4.0*

Experience

Salesforce June 2026 - Aug 2026
Software Engineer Intern *San Francisco, CA*

- Built and shipped a cost analysis engine and dashboard quantifying productivity cost of required-reviewer "locks" for Salesforce's Core monorepo.
- Architected the team's lock-approval workflow, replacing intuition with data-driven verdicts.
- Sped up the lock approval process for sensitive files by 8x, affecting 8000+ engineers.
- Cut engine runtime by 40% via caching and optimizing git log queries.

University of Illinois Urbana-Champaign Aug 2025 – Present
Course Assistant (CS 374: Algorithms and Models of Computation) *Champaign, IL*

- Assist in teaching and supporting 500+ students in CS 374, a core algorithms course, by hosting office hours, answering Ed Discussion questions, and grading assignments.

John Deere Jan 2025 – Sept 2025
Part-Time Student Software Engineer *Champaign, IL*

- Full-stack development for Deere's Service Center platform, managing over 20 files and 1300+ lines of code.
- Built and enhanced React components to display data from external APIs and monitor machine statuses with React hooks, TypeScript, Python, and MFEs.

Synchrony Financial May 2024 – Dec 2024
Emerging Tech Center Intern (API Engineering Team) *Champaign, IL*

- Used Python, XML, Git Bash, Node.js, BitBucket, and Postman to create shared flows and proxies in Apigee Edge regarding: post client flow, json (Splunk) logging, and automating Apigee lint upgrades.
- Followed the Agile workflow, completed over 13 stories, and contributed to 2 features for the API train.

Selected Projects

GetLitty (Event Travel Planner) | **Git** | *Google Cloud Platform, MySQL, JavaScript, HTML/CSS* Aug. 2025 – Dec. 2025

- Full-stack web application that aggregates data from Ticketmaster API and Airbnb lodging prices to help users find the most cost-effective events to attend.
- Implemented MySQL database with 7 tables managing 1,000+ rows, built RESTful API with Node.js, and optimized queries using stored procedures, triggers, and transactions.

Stock Predictor Deep Learning Model | **Git** | *Pandas, Numpy, BeautifulSoup, Git* Aug. 2023 – Dec. 2023

- Used Google Colab and Python libraries, including pandas, numpy, and beautiful soup, for web scraping real-time data from search engines such as YahooNews and YahooFinance.
- Pre-processed the data and used data wrangling to clean it before feeding it to the model. Used semi-supervised learning for sentiment analysis.

Breast Cancer Detection Model [1st Place Tech4U Hackathon] | *Python, Colab* June 2021 – July 2021

- A convolutional neural network (CNN) trained to detect abnormal cell growth for breast cancer.
- Worked with clinical cell images to generate the CNN and visualized model's results with PCA.

Leadership

Illinois Women in Computer Science Aug. 2023 – Present
Vice President (2026-27), Treasurer (2025-26), Corporate Co-Chair (2024-25) *Champaign, IL*

- Responsible for organizing General Meetings, WCS Chicago Retreat, tech talks, coffee chats, and other workshops by contacting prospective sponsors. Oversees the Corporate Committee.

Girls Who Code June 2021 – June 2023
Co-President (Illinois Math and Science Academy) *Aurora, IL*

- Managed 3 sub-groups, hosted 2 hackathons and 20+ learning group sessions; increased club membership by 200%.

Technical Skills

Languages: Java, Python, C♯, C++, C, JavaScript, SQL, XML, Verilog, TypeScript, Node.js, HTML/CSS, R, PHP, Q♯
Frameworks: Apigee API Gateway, PostgreSQL, WordPress, Arduino, CAD (Solidworks), Postman, Next.js, Splunk
Developer Tools/Libraries: React, Git/Github, Docker, VS Code, Visual Studio, Android Studio, BlueJ, IntelliJ, Eclipse, Google Colab, XAMPP, Roblox Studio, Pandas, NumPy, Matplotlib, Tableau, Google Cloud Platform (GCP)
